

## Projects Seminars

The CHIST-ERA projects seminars bring together once a year the researchers involved in the ongoing projects funded by CHIST-ERA and the representatives of the research funding organisations. The main objective are to:

- Contribute to the follow-up of the projects by the funders with the help of review experts, in addition to the written reporting and reviewing process;
- Promote exchanges between projects;
- Strengthen the scientific communities working in the topics of the CHIST-ERA calls;
- Support efforts toward new collaborative and interdisciplinary research;
- Encourage promotion of research results and technology transfer;
- Contribute to the long-term assessment of CHIST-ERA calls and to the shaping of CHIST-ERA in the long run

This is done through several activities:

- Presentations of projects to representatives of other projects in the same topic, review experts and representatives of funding organisations;
- Poster and demo networking sessions.
- Discussion and elaboration of strategic research agendas, technology roadmaps and strategies for technology take-up.

The presentations proposed at the seminars (project presentations & topic presentations) are available [here](#) <sup>[1]</sup>.
