

LMT

Research Council of Lithuania

Lietuvos
mokslo
taryba

The [Research Council of Lithuania \(LMT\)](#) ^[1] has been founded 1991 to fulfil the role of an expert institution tackling challenges of science development on a national level. The Council is a counsellor of the Lithuanian Parliament and the Government on research and researchers training issues, implements programme based competitive funding of research, administers most important Lithuanian science development programmes, evaluates research performance and represents Lithuanian science in various European institutions and other international organisations.
