Presentation of AMIS

AMIS: Access **M**ultilingual **I**nformation opinion**S**

- Starting date: December 2015
- Duration: 36 months
- The consortium is composed of partners from three countries:
 - France: University of Lorraine (LORIA), University of Avignon (LIA)
 - Poland: University of Science and Technology Kraków (AGH)
 - Spain: University of DEUSTO (Bilbao)

The key challenge and potential impact

- With the growth of information on internet, a new issue arises: How to access to a maximum of information?
- A huge amount of information is available but most of them is unattainable.
- High educated people, do not speak more than two or three languages while the majority speaks only one, which makes this huge amount of information inaccessible
- How to make the main idea presented in a video in a foreign language accessible and easy to understand by everyone?
- Accessing to information in foreign languages would permit to access to the other side of a story
- Due to political, socio-cultural or religion reasons, divergence of opinions may exist within two medias from two different sources.

Objective1: Understanding the main idea of a media in a foreign language

← Video Summarization

← Video Summarization

← Extraction of the speech Signal

← Video Summarization

← Extraction of the speech Signal

← Speech Recognition

بين قوات الأمن والمحتجين في
ميدان التحرير بالقاهرة بعد تنقل صور
مثيرة للجدل على شبكة التواصل الاجتماعي

← Video Summarization

← Extraction of the speech Signal

بين قوات الأمن والمحتجين في
ميدان التحرير بالقاهرة بعد تنقل صور
مثيرة للجدل على شبكة التواصل الاجتماعي

← Speech Recognition

Between security forces and protesters in
Cairo's Tahrir Square after the movement
of controversial images on social network-
ing

← Machine Translation

Synthesis

← Video Summarization

← Extraction of the speech Signal

مثيرة للجدل على شبكة التواصل الاجتماعي

← Speech Recognition

Between security forces and protesters in
Cairo's Tahrir Square after the movement
of controversial images on social network-
ing

← Machine Translation

Synthesis

A pipeline Architecture for understanding a video

- A pipeline system: Video summarization, Overlaid Text Extraction, Speech Recognition, Machine Translation, Speech synthesis

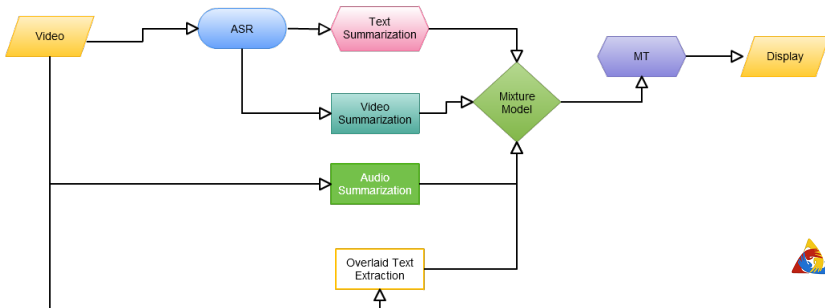

- The drawback is that the errors of each component are propagated to the following one.

A collaborative architecture for understanding a video

- The different components must collaborate in a successful synergy to achieve the translation of the main idea of a video in a target language

A collaborative workflow of AMIS

Objective2: Cross-lingual opinion analysis

- A first video (V_1) on a language A
- A second video (V_2) in language B concerning the same topic
- V_1 is summarized into language B to achieve V_1^s
- V_2 is summarized to achieve V_2^s
- V_1^s and V_2^s in terms of opinions (objectivity, polarity, anger, sadness, joy, disgust, fear and surprise)

Application

A press review but in terms of opinions. This is interesting when there is a difference in terms of culture, foreign policy, religion, etc.

Objective2: Cross-lingual opinion analysis

الرئيس ياسر عرفات زعيم
ثورة وقائد دولة

Objective2: Cross-lingual opinion analysis

الرئيس ياسر عرفات زعيم

ثورة وقائد دولة

The President Yasser
Arafat hero of a revolution
and State guide

Objective2: Cross-lingual opinion analysis

الرئيس ياسر عرفات زعيم
ثورة وقائد دولة

The President Yasser
Arafat hero of a revolution
and State guide

Mort du terroriste Yasser
Arafat : la France écarte
à nouveau un empoison-
nement

Objective2: Cross-lingual opinion analysis

الرئيس ياسر عرفات زعيم
ثورة وقائد دولة

The President Yasser
Arafat hero of a revolution
and State guide

Mort du terroriste Yasser
Arafat : la France écarte
à nouveau un empoison-
nement

Death of terrorist Yasser
Arafat: the France dis-
cards again the thesis of
poisoning

Objective2: Cross-lingual opinion analysis

الرئيس ياسر عرفات زعيم
ثورة وقائد دولة

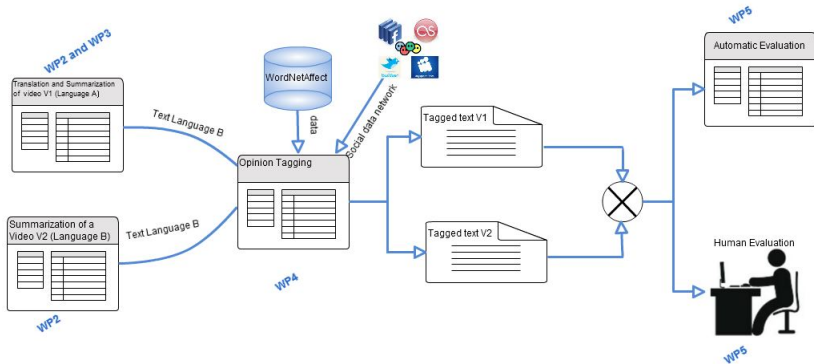

The President Yasser
Arafat hero of a revolution
and State guide

Mort du terroriste Yasser
Arafat : la France écarte
à nouveau un empoison-
nement

Death of terrorist Yasser
Arafat: the France dis-
cards again the thesis of
poisoning

A general description of AMIS in its basic form

Several challenges

- AMIS could be incorporated in a TV remote control or such as software associated to any internet browser.
- In conclusion AMIS will address the following research points:
 - Text, audio and video summarization.
 - Automatic Speech Recognition (ASR)
 - Machine Translation
 - Cross-lingual sentiment analysis
 - Achieving successful synergy between the previous research topics

Presentation of partners :

AGH University of Science and Technology, Kraków - Poland

AGH has a strong skill on video content summarization

AGH leads several WP:

- Definition of the requirements and data video collection
- Video summarization and video content analysis
- Automatic Evaluation of the different components
- Dissemination

Presentation of partners :

DEUSTO University Bilbao Spain

DEUSTO has a strong skill on experience in designing evaluation test and test methodologies with people with special needs.

DEUSTO composed by psychologists, engineers and linguists will participate to:

- End-user Evaluation
- Collecting social network data
- Protocol of tests and evaluation

Presentation of partners :

University of Avignon - LIA France

The LIA of university of Avignon (UA) has a strong expertise on speech, audio and language processing and, more specifically, on automatic summarization (text and audio).

LIA will participate to:

- Text and audio Summarization
- Coverage of an event on social network

Presentation of partners :

University of Lorraine - LORIA France

The LORIA of university of Lorraine has a strong expertise on speech recognition and machine translation

LORIA is the coordinator of AMIS and is responsible of few WP:

- Speech Recognition (MULTISPEECH)
- Machine Translation and Opinion mining (SMarT)
- Text overlaid extraction (QGAR)
