# CHIST-ERA Projects Seminar

## *Topic AMCE*

***Fabio M. Carlucci***  
**Brussels, March 22-23, 2017**

**FUNDING OPPORTUNITIES** from the

**FUTURE & EMERGING TECHNOLOGIES** scheme

# Presentation - Adaptive Machines in Complex Environments (AMCE)

- ❖ **Complex environments**
  - | AdaLab, COACHES, ALOOF
- ❖ **Autonomy**
  - AdaLab, COACHES, ALOOF
- ❖ **Project overlap**
- ❖ **Major outcomes and achievements**
  - AdaLab, COACHES, ALOOF
- ❖ **Remaining challenges and needs**

# Projects

- ◆ **AdaLab: Adaptive Automated Scientific Laboratory**
  - ◆ <http://www.chistera.eu/projects/adalab>
  - ◆ Brunel University, University of Manchester, University Paris-Nord, University of Evry-Val-d-Essonne, KU Leuven
- ◆ **COACHES: Cooperative Autonomous Robots in Complex and Humans Environments**
  - ◆ <http://www.chistera.eu/projects/coaches>
  - ◆ University of Caen Basse-Normandie, Sapienza University of Rome, Vrije Universiteit Brussel, Sabanci Universitesi
- ◆ **ALOOF : Autonomous Learning of the Meaning of Objects**
  - ◆ <http://project.inria.fr/aloof>
  - ◆ Sapienza University of Rome, University of Birmingham, TU Wien, Inria

# Environment - AdaLab

chist-era

# Environment - COACHES

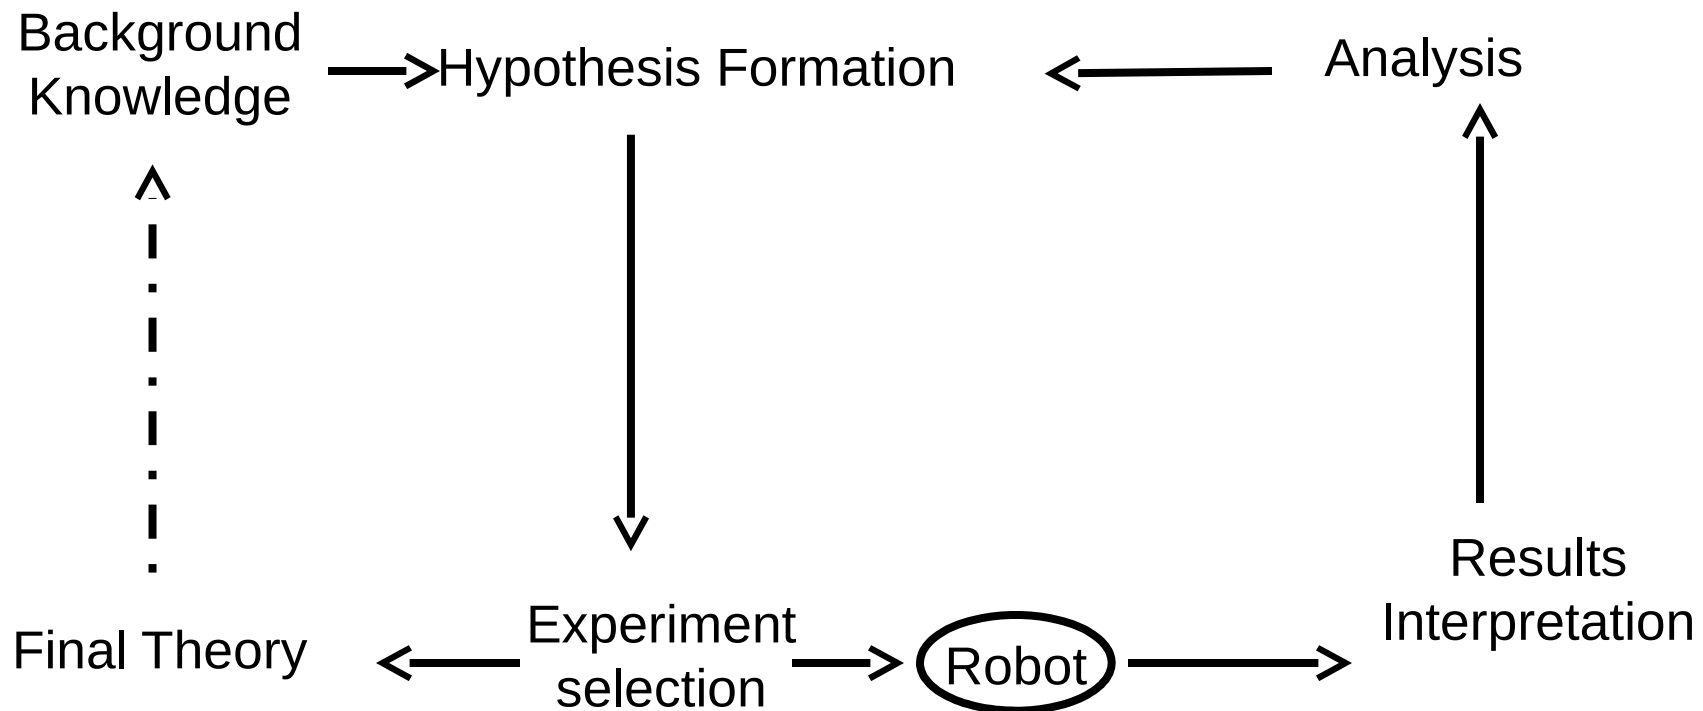

# Environment - ALOOF

# Autonomy - AdaLab

Computer systems capable of originating their own experiments, physically executing them, interpreting the results, and then repeating the cycle.

chist-era

# Autonomy - COACHES

- ❖ Monitoring the environments
- ❖ Interacting with people
- ❖ Distributed planning for
  - ✓ Accomplishing tasks : assistance, escort and support security units
- ❖ Robust navigation in crowded environments

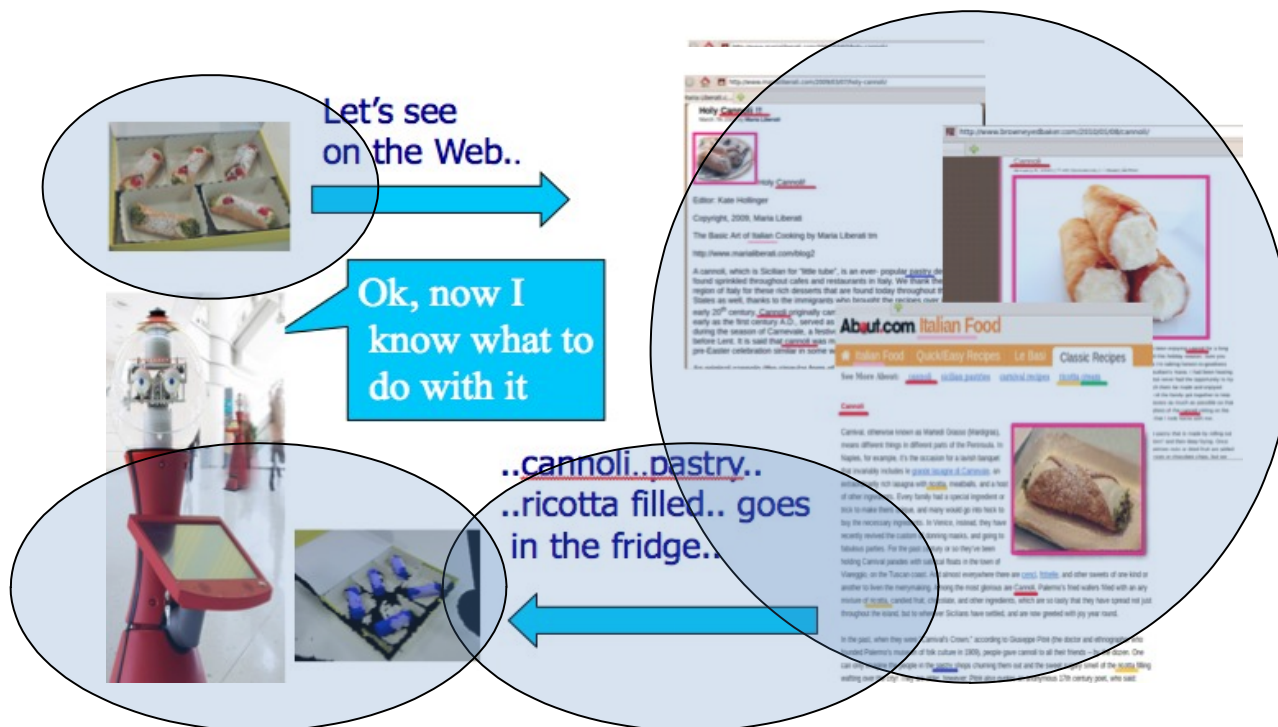

# Autonomy - ALOOF

*How does a robot know  
it doesn't know?*

*How to extract from the Web  
information useful for a robot,  
from a robot query?*

*How to use such information  
to build a semantic object map?*

*How to bridge between the  
Web representations and the  
own robot representation?*

# Project Overlap

- ❖ Knowledge representation
- ❖ Probabilistic reasoning about an uncertain environment
- ❖ Human computer interactions
- ❖ Planning – partial information, constraints

# Major outcomes and achievements - ALOOF

- ❖ Automatic creation of a perceptual and semantic knowledge base for robots on demand, from the Web
- ❖ Large-scale, long term autonomous semantic mapping of space

# Major outcomes and achievements - COACHES

- ❖ Knowledge-based environment modeling
- ❖ Distributed decision making and reasoning techniques for joint and collaborative activities
- ❖ Multi-modal human-robot interaction
- ❖ Face detection and body tracking
- ❖ Physical implementations in real and different environments

# Major outcomes and achievements - AdaLab

- ❖ Integrated Autonomous System for Scientific Research
- ❖ Three novel machine learning systems for generating scientific hypotheses.
- ❖ Two novel AI systems for deciding on scientific experiments.
- ❖ Novel biological knowledge about cancer and ageing.

# Remaining challenges and needs

- **Planning – partial information, constraints**
  - Representation of default knowledge
  - Unplanned and conflicting situation
  - Collaborative, multi-agent planning with partial information
  
- **Human-robot knowledge building and sharing**
  - Collaborative Knowledge discovery
  - Fusion of heterogeneous sources of information
  - Adjustable autonomy

**chist-era**

# Questions ?
