

Intelligent Sharing of Explanation Experience by Users for Users

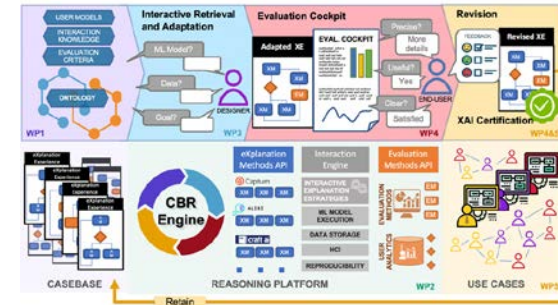

[www.isee4xai.com](http://www.isee4xai.com)

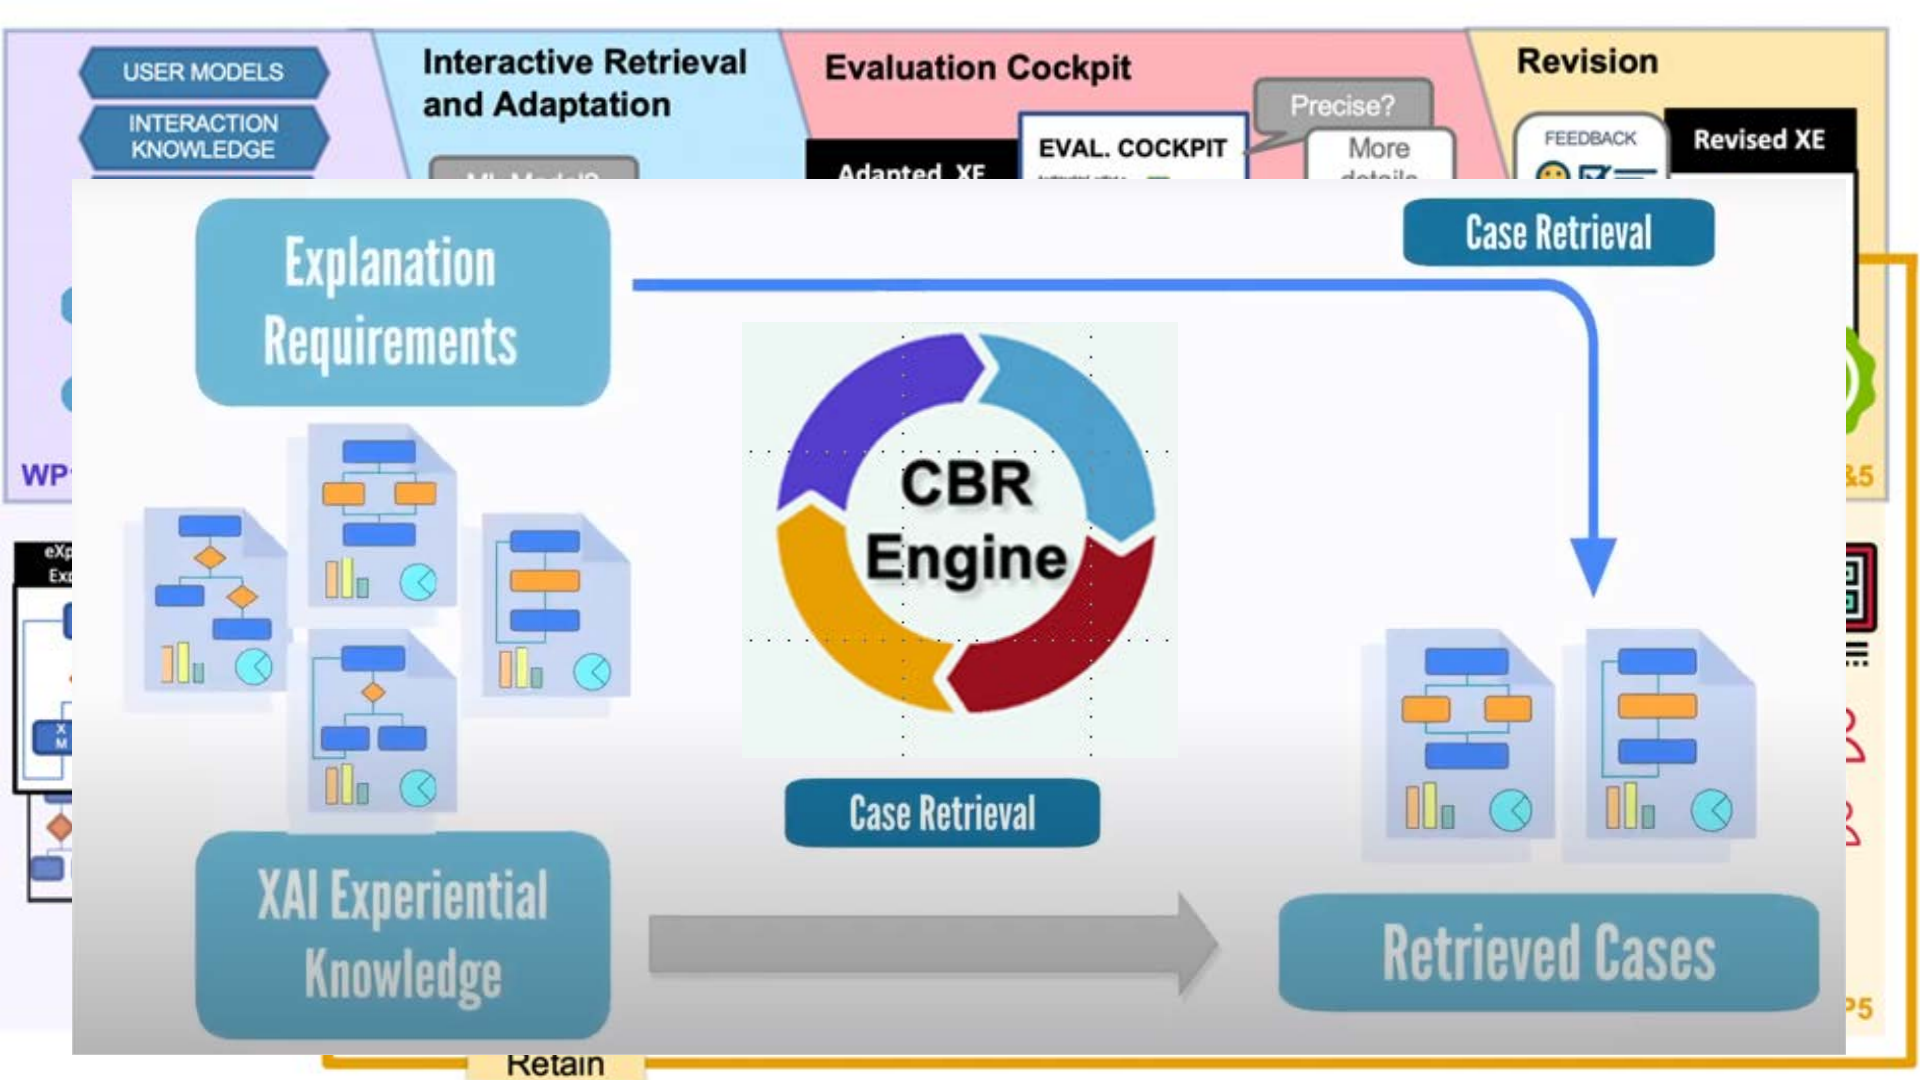

This project has received funding from the CHIST-ERA  
CHIST-ERA-19-XAI-008

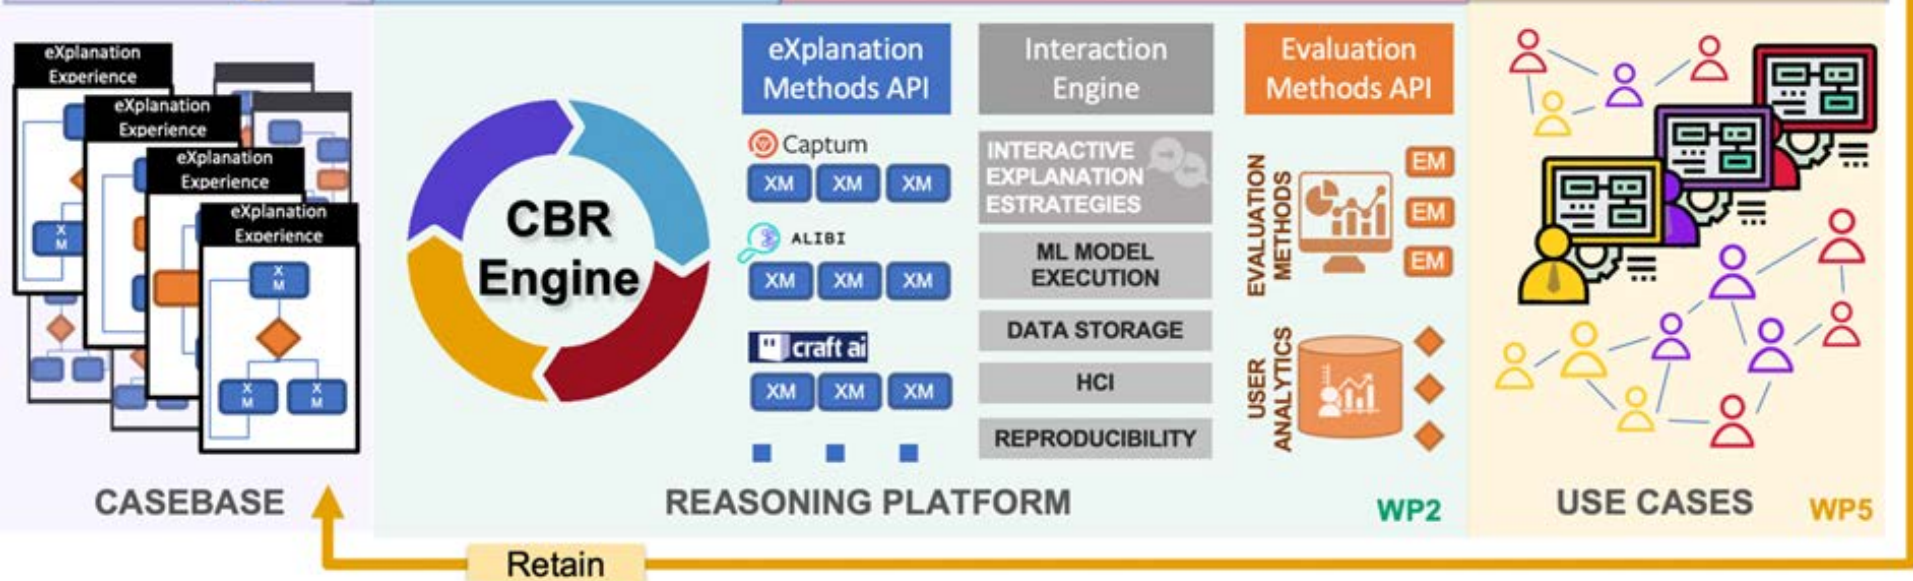

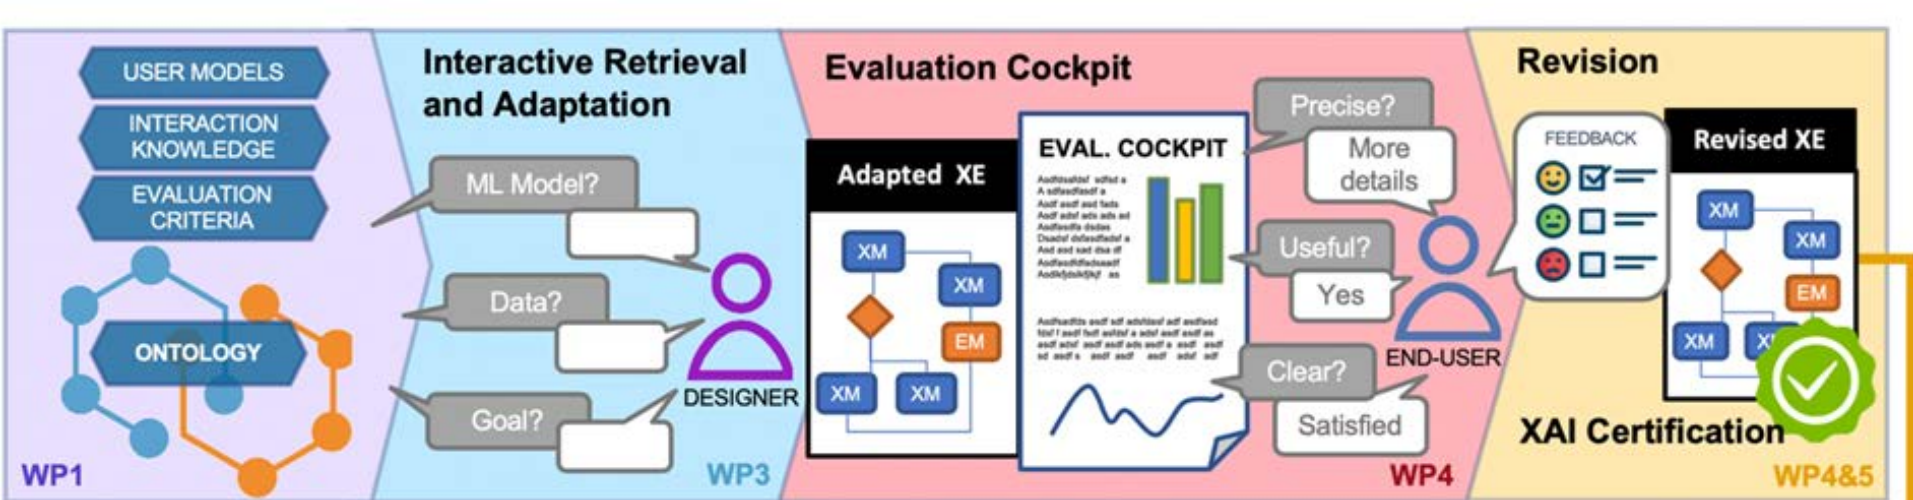

# iSee Our proposal to the XAI challenges

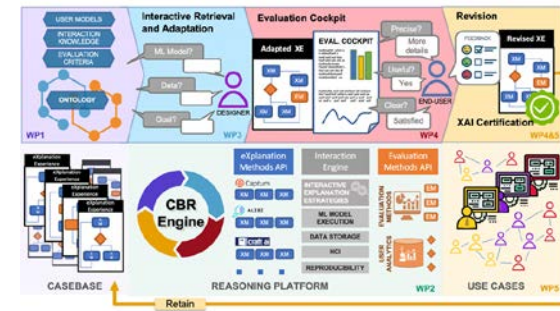

- Promoting the use of explanation strategies
- Capture, share and reuse explanation experiences
- Provide the AI community with an unifying open source platform
  - Underpinned by **case-based reasoning (CBR)**
  - Experiences of **applying an explanation strategy** to an ML task can be captured as cases and retained in a case base for **future reuse**.
- **Recommend how best to explain** ML predictions to other users in similar circumstances
- **User participatory approach**
  - **Co-creation of explanation strategies** between machine and users
  - Evaluation of the **utility of the explanations**

- The key components
  - Library of XAI strategies
  - Ontology
    - Vocabulary and metrics to evaluate their acceptability and suitability
  - Evaluation cockpit
  
- Main challenges
  1. **XAI community engagement**
    - Capture explanation best practices
  2. Evaluation with human in the loop
    - User acceptance of XAI strategies
    - Construct explanations based on interactions

Belen Díaz Agudo, Juan A. Recio García, Luis Hernández Yáñez, Marta Caro Martinez

- Knowledge-based approaches in CBR, deep learning, transfer to platform development (jColibri and COLIBRI studio).
- Existing collaboration with the IAAA-MX research group in México that will provide use case 4 (Natural Event Detection) and Bosch Spain (use case 3)

Nirmalie Wiratunga, Anjana Wijekoon, David Corsar, Kyle Martin, Chamath Palihawadana, Ike

- Intent mining, Conversational digital behavioural change interventions in healthcare systems (use case 2)
- Initiative in the National Subsea Centre, where AI systems play an important role for Oil and Gas operations.

Derek Bridge

- Designing explanation strategies for CBR and recommender systems
- Interface between the communities involved in iSee with researchers in Ireland's Insight Centre for Data Analytics

Anne Liret, Abdoulaye Fadiga, Bruno Fleisch (BT France), Dipankar Nath (BT Hungary)

- Responsible use of AI from an ethical and regulatory perspective
- Open Innovation ecosystem to help businesses in complying with obligations of explaining AI decisions.
- Existing research on use case 1 and 5 (Active learning in Telecom network operations & security incident management).
- User intent and impact modelling applied to explanation co-design
- Cyber defence research

Dr David Aha  
Director for the  
Navy Center of  
Applied  
Research in AI  
(NCARAI), USA

Dr Judith Masthoff  
Professor Human  
Centered Computing,  
University Utrecht

Dr Frances Brazier  
Professor Policy and  
Management, Multi-  
Actor Systems,  
Faculty of  
Technology, TU Delft,  
Netherland;

Alexander Weir  
Senior Technical  
Manager, Canon  
Medical Research  
Europe Ltd.

Dr Manish Patel  
CEO Jiva.ai

Micea  
Velिकासु, VP  
Ness Digital  
Engineering;

Miguel Granda, Head of  
Research & Innovation  
Policy and Coordination  
of industry 4.0. Bosch  
Spain;

Mauricio Orozco  
del Castillo, Chair  
of the AAAIMX  
Board;

Abdoulaye Fadiga,  
Head of Cyber Security  
operations  
BT France.

Anomaly detection in production lines with BOSCH  
Engineering

Natural Event Detection with IAAA-MX

Radiology with Jiva.AI

Cybersecurity with BT France  
Engineering

- **iSee platform**
  - Ease the necessity of XAI as a service for society.
  - Policy changes through evidence-based **explanation best practices.**
- **Results:**
  - Ontology and software objects
  - Opportunity for XAI developers to include XAI strategies in iSee
- **Community engagement**
  - SICSA-XAI workshop (June) <https://sites.google.com/view/sicsa-xai-workshop>
  - CBR-XAI workshop (September) <https://gaia.fdi.ucm.es/events/xcbr/>
- **Publications to Open science repository and standards**
- **Create a European XAI compliance certification**

# Questions

iSee is an interactive toolbox for XAI with Case-based Reasoning at heart

iSee captures, shares and re-uses AI explanation experiences

You can interact with, experiment with, and evaluate iSee AI explanations to create
